A user event held on Suomenlinna brought more than 40 experts, from over 20 of Savcor's customer companies, together to learn about the renewed Wedge-process diagnostics tool and to meet other users of the application. The itinerary included accounts of Wedge user experience and the benefits created by the tool. These were shared by representatives of Altia, Andritz, CABB, SSAB, Stora Enso, and Valmet. Also, Savcor product manager Mika Suojärvi spoke about the recently released Wedge 8.2 and the new features this version brings.
